TOP TIPS FOR CYBER DEFENCE BEST PRACTICE

CST

1 KEEP THE THREAT OUT: OBVIOUS BUT TRUE
Ensure boundary firewalls and internet gateways are in place to prevent unauthorised access

2 LIMIT THE CHANCE FOR THE THREAT TO SUCCEED
Implement secure configuration to ensure systems are as water-tight as possible

3 REDUCE THE ABILITY FOR THE THREAT TO SPREAD
Roll out access control policies to enforce appropriate rights for each employee

4 BLOCK AUTOMATED THREATS
Ensure malware and virus protection is installed, operational and effective

5 PATCH PATCH PATCH
With 90% of cyber-attacks exploiting known security flaws, get the basics right and patch

6 KNOW YOUR WEAKNESSES
Run regular Vulnerability Assessments and Pen Testing to highlight any weak spots

7 PROTECT THE OBVIOUS
With email and web being the main entry point, ensure you lock those doors

8 MAKE STAFF THE SOLUTION NOT THE PROBLEM
Implement standard policy, procedure, training and awareness for all teams

9 BE PREPARED FOR THE WORST
What would you do? Are you ready to mitigate and repair when a breach strikes?

10 COMPLETE THE CYBER ESSENTIALS ASSESSMENT
CST are a registered body and can help you every step of the way

CYBER DEFENCE

The protection of your organisations environment (and ultimately your data) from the threats posed by you being connected to the internet

PROTECT

How do I minimise internet threats gaining access to my environment and reduce their chances of succeeding?

DETECT

When a breach occurs, how do I understand the what, when and how? How do I contain the threat and reduce the impact?

NOW YOU HAVE CYBER DEFENCE COVERED, ASK OUR TEAM FOR THE

10 TOP TIPS FOR INFORMATION PROTECTION
