

9 reasons Symantec Endpoint Protection Cloud is the ideal security candidate

Wish you had one all-encompassing security capability that could just get the job done with minimal effort from you? Of course, especially since 65% of all cyberattacks target businesses like yours¹. See all the reasons why you need Symantec Endpoint Protection Cloud, and why it's the ideal way to protect devices in small and medium size businesses.

01 Fast protection

We've taken the winning capabilities of our enterprise-grade endpoint protection and packaged them up to work for smaller businesses. It starts with simple deployment that will get you up and running in 5 minutes.

02 Secure all devices with one product

Protect PCs, laptops, mobile phones, tablets and servers, along with OS support for Mac, Windows, Android and iOS. Use external USB devices? We help make them less risky too.

03 Experience peace of mind with award-winning security

Is Symantec Endpoint Protection highly rated? It won AV-TEST 'Best Protection Award', scoring top marks for a whole year protecting against evolving zero-day threats². How about that for a weight off your mind?

04 Stay secure around the clock

Machine learning and artificial intelligence analyse and learn from 9 trillion rows of security telemetry to protect your business against emerging threats, ransomware and zero-day attacks. All this happens in real time which helps to keep you safer.

05 Focus on core activities with effortless management

As the name suggests, this solution is cloud-based. It's always on and self-managing with a simple dashboard for reports and alerts.

06 Spend less capital, get more value

We know you don't want expensive annual licensing upgrades that hit your finances hard, so Symantec Endpoint Protection Cloud comes in an affordable pay-as-you-go model.

07 Be supported by cyber intelligence experts

The solution comes with the backing of 1,000 Symantec cyber warriors working across nine global Security Operations Centers to protect against the latest threats, wherever they arise.

08 Get proactive not reactive

Nothing gets left to chance. All new devices will be secured before threats can target them, including mobile devices, which can also be wiped remotely, if needed.

09 Tailor security for every user

Symantec Endpoint Protection Cloud helps to keep your people safe, yet productive, with role-based security policies that are automatically pushed out to users. They can set up personal or company devices via our portal, any time.
